

Dear Sir,

We Ben Fadil Company are specializing in all sorts of earth works activities, which shall include excavation, backfilling, ground leveling, roads construction ... etc. However, we hold more than 30 years of experience in this field, supported by recognized firms, qualified technical staff, supervisors, inspectors, machines operators, mechanics, and drivers.

Because we have the expertise, the right machines and equipments, we performed our obligations as a contractor and subcontractor to undertake many different challenging projects and assignments which were delivered to our clients to the highest standards possible and on scheduled time.

This gives us the confidence to put at your disposal our capabilities and experience, and to share with you goals achieving in a quality manner. Ben Fadel prides itself in its commitment to providing the highest quality of service and operating performances to our customers. Our proactive style of management, coupled with honesty and integrity, allows us to apply lessons learnt to the benefit of our customers, suppliers and employees.

Our quality policy is to "Continuously improve our services" to exceed our customers expectations. We aim to achieve the highest level of customer satisfaction.

Therefore, please find attached list of services provided, machines & equipments, and brief description of previously implemented contracts, and last but not least certificates of achievements.

We are looking forward to do business with you.

CEO

Abraheem Qassim Ben Fadel

Services Provided

The Company is capable and equipped to perform various types of earth works which includes:

A — Excavation

1. This branch of our specialization embraces excavation in hard rock, soft rock and soil.
2. Construction excavation.
3. Channel excavation for all sorts of transmission pipelines.
4. Excavation for electrical trenches.

B — Backfilling

We perform the backfilling in accordance with the recognized specifications and applied norms.

C — Leveling and Removal of Debris

We carry out site grading and disposal of debris.

D — Road Construction

This part of our work includes the construction of paved and unpaved roads, in accordance with the recognized specifications and applied norms.

E — Equipment Rental

We have the provision of renting reliable earthwork equipment and machines coupled with skilled and efficient operators.

Equipment & Machines

No.	Description	Type	Weight / Ton	Qty
1	Excavators	Bulldozer Kumatsu	41	1
		Hyundai 210LC	27.5	1
		Hyundai 305LC	29.8	7
2	Loaders	CAT 966D	25	1
		CAT 966C	22	1
		Hyundai 770	30	1
3	Bulldozer CAT	CAT D8K	35	5
4	Grader CAT	CAT 12G	16	2
5	Compactor	Bomag 25T	10	2
6	Dump Trucks	MAN	17 m ³	8
7	Trucks	Iveco	25	1
8	Fuel Truck	Mercedes	15	2
9	Lowbed	Calbraise	60	1
10	Dumper	Calbraise	35 m ³	1

Technical Teams

No.	Job Title	No. of People
1	Project Manager	1
2	Site Engineer	2
3	Survey	3
4	Foremen	4
5	Senior Machine Operator	5
6	Driver / Machine Operator	18
7	Mechanics	3
8	Mechanics Assistant	3
9	Planning & Follow-up Specialist	1

Contracts Implemented

● Western Libya Gas Line Project - Agip Gas

The project owner: Agip Gas - Libya. Main contractor Chinese National Oil Co. Hamada Pipeline Co. was a subcontractor for Chinese National Oil Co to supply, transport, and install a two-way pipe line (16" and 32") for a total distance of 700 Km. We were subcontracted by HPC to do the excavation and placement work of those pipes from Wafa Oil Field to Derj: 75 Km.

Seraj Co. was also subcontracted by Chinese National Oil Co for construction and excavation work. We were subcontracted by Seraj Co. to do the work on their behalf. This project involved an installation of a two-way pipeline (16" and 32") for a total distance of 65 Km, from Melita - Hawamid.

● **Sezia Turkish Co. - Benghazi Gas Pipe Line**

We were subcontracted by Sezia (Turkish Co.) to do the excavation work which involved installing a pipe line from Ras Elmengar to Benghazi Sea Port, a distance of about 18 Km.

Also, subcontracted by Sezia (Turkish Co.) to do all the construction work for the installation of 250 High Voltage Towers (Jabal El Hasawana).

● **Wadi Zaite and Harawa Project - Enka (Turkish Co.)**

We were subcontracted by Enka (Turkish Co.) to do the excavation work. This contract lasted for about two and a half years (from 16/07/1996 to 13/01/1999).

● **Mabrouk Oil Field Project - Total Company**

The project owner: Total Company. GTME was the main contractor to fully construct a new oil field. Burgen Co. was a subcontractor for GTME; we were assigned by Burgen Co. to provide them our excavation and leveling machinery. This rental contract lasted for more than six years.

● **Siraj Co. - Ubari Field**

A rental contract of our machinery, D8K and D9L, to remove the sand "mountains" in the Charara Field - Ubari.

● **Different Projects - Salah Edeen Co.**

- Beriga Airport: demolition and removal of the old airport.
- Zeliten Field: excavation of 12 Km for oil pipeline.
- Laheeb Field: participating in the renewal of the internal pipeline network at Laheeb Field.
- Tahadi Field: excavation of 70 Km for oil pipeline.

● **Water and Sewage Network Project - General Works Authority, Benghazi**

We were subcontracted to excavate the lines for the Benghazi Water and Sewage Network project.

● **Fadeel Corporation - Man Made River Project, Sirte**

We were subcontracted to excavate the lines for the Man Made River project in the Sirte area.

● **Man Made River Project - J&P**

Excavation, and preparation to build MMRP water reservoirs and storages in the Sirte area.

● **Omer El Mokhtar El Kabeer Reservoir**

The owner of the project is the Great Man-made River Water Utilization Authority – Phase I (GMRWUA). The project consists of building a reservoir with a capacity of 24 million cubic meters of irrigation water. The radius of the dam is about 1,150 m, and the height is about 31 m. We entered into a contract with the Completion Committee as main contractor, which lasted for more than 21 months, to perform:

- Mobilization and stockpile preparation of soil materials at Sidi Ibrahim Quarry.
- Crushing of mass rocks to be used at Sidi Ibrahim Crushing Plant.
- Mixing of filling materials (Zone 8A filler) used in dam construction.
- Rental of various machines and equipment to perform different activities required for the project.

● **Tekser Co.**

Tekser Company is the contractor for Project No. 318. The project scope is to lay a pipe from Omer El Mokhtar Reservoir to the pump station (319). The total excavation volume was about 25,000 cubic meters, and the average depth was 15 meters. The work was performed in accordance with Great Man-Made River specifications.

The backfilling of the said pipeline was carried out in the following sequence: screening the excavated materials, mixing with water, laying and compacting in intervals of 20 cm, with compaction of 95% of MDD.

● **KSB Company**

The owner of the project is the Great Man-made River Water Utilization Authority – Phase I (GMRWUA). We carried out the excavation works for the pump house. In addition, we carried out all the project-related backfilling activities, and the construction of paved roads, as well as the parking area.

● **Petroject Company**

Our company performed the excavation works for the Gas Pipeline (Jagbob to Tobreq). The total distance was about 21 Km. We were the subcontractor for Al Fergar Company. The depth of excavation varied, as did the type of soil and rocks in the project area.

The estimated completion time for the said project was 4 months, but we were able to complete our obligations in just less than 3 months. Such performance from our side was appreciated by the owner.

● **Arsel & BT for Building and Construction J.V**

The scope of our work is to excavate and transport the excavated materials related to the Al Marj Housing Blocks. The total number of blocks is 167, where the area for each block is about 529 m².

Due to the nature of the work, and the precision required to implement it, our company had to develop a certain number of forms related to survey and quantity take-off. In addition, our invoice-related documents were also modified to reflect the actual works carried out at site. Moreover, we were assigned by the owner to perform the excavation of the project roads, estimated to be about 500,000 m³.

Since the method of implementing the said project requires a certain degree of precision and coordination of excavation activities, to avoid the accumulation of excavated materials which may prevent accessibility to the site, our company assigned qualified supervisors and surveyors to coordinate the works with the owner, in order to prevent any conflict with the other activities at the project site. To achieve this goal, our company provided the project with a sufficient number of equipment and worked extra hours.

Our efficiency in the said project encouraged the owner to assign the transportation of aggregate (from Al Abbiar to Al Marj) to us, where we were able to provide the suitable number of trucks to assure the continuous supply of aggregate.
